

SEMINAR ON WASTE-TO-ENERGY 2015

A TAP Centre Programme

Did you know that **WTE technology** can effectively reduce waste to almost 10% of its original volume?

Join us in an upcoming seminar to learn about the full capabilities of Waste-to-Energy (WTE) technologies!

In its second run after a successful launch in 2014, WMRAS, ISWA and NEA are happy to present a **Seminar on Waste-to-Energy**, a unique programme that combines the technical and policy expertise of senior experts from Europe and Singapore, with extensive WTE project development and implementation experience.

What You Can Learn:

Technical, economic and environmental aspects of developing WTE facilities

Characteristics of high performance energy efficient plants

Best available techniques for plant operations

Gain a better appreciation of environmental policies conducive for WTE developments, viable business models for WTE projects as well as insights into market opportunities for waste management projects in Asia

Visit state-of-the-art WTE facilities

Who Should Attend:

The seminar is designed for waste management professionals, engineers, technical experts, researchers and business development professionals seeking to address waste management challenges in the context of fast growing cities in Asia.

About TAP Centre

The Training, Advisory & Promotion (TAP) Centre was established under a tripartite agreement among the International Solid Waste Association (ISWA), Waste Management and Recycling Association of Singapore (WMRAS), and National Environment Agency (NEA) on 28 June 2010. ISWA's first-of-its kind training centre outside Europe, where the association is based, the TAP Centre organises regional and

international waste management training workshops, forums and tradeshow to promulgate an efficient waste management environment in Asia. The TAP Centre will be a key hub for sustainable waste management in Asia, where it will serve as a depository of knowledge and data, and catalyst for regional collaboration and public-private partnerships in the region.
